PC Game Review

Nidhogg is a fun single player/multiplayer 2D fencing game. The aim is to kill your opponent to gain the “go arrow” to get to the other side, however your opponent respawns and has multiple chances to try kill you and gain the advantage for themselves. In single player you fight against AI at varying different maps at increasing difficulty. In multiplayer you can either play online or local. You fight against each other in a map of your choosing. At the end of the game you will run past a crowd of people and get eaten by the Nidhogg, as that is your objective. It looks basic but it's a fun game to play especially with a friend. Get it on [Steam](#) for £6.99.

Fencing on YouTube

Markiplier heads to a fencing club to learn the ancient art of fencing! It does not go well for him ...

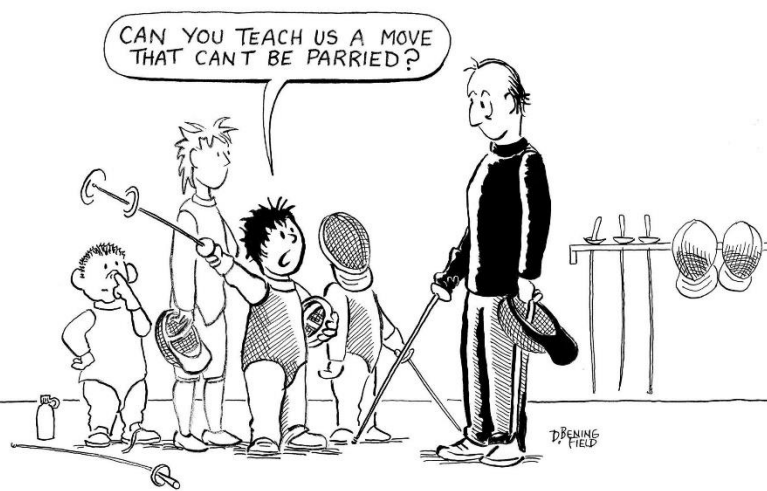

Fails in the sport of Fencing don't happen very often. But those that do are usually pretty funny!

Mobile Game Review

FIE Swordplay – Android, iOS

Quite realistic fencing game that plays quite well on mobile. As you go through the stages you pick up more prizes, fight harder competitors and upgrade your equipment. There are In-App purchases, but I didn't see any when I was playing the early levels. The controls are a bit basic but still a fun game.
